PROFESSIONAL SUMMARY

Master's in Computer Science at University of Cincinnati with focus on machine learning, data systems, and scalable backend engineering. 2+ years of experience building production-grade cloud automation and ML systems, driving measurable improvements in deployment efficiency, data processing, and model performance.

EDUCATION

Master of Science in Computer Science - University of Cincinnati Aug 2024 - May 2026

Relevant Coursework: Advanced Algorithms, Deep Learning, Intelligent Data Analysis, Database Theory.

Bachelor of Engineering in Computer Engineering - AISSMS College of Engineering Aug 2018 - Jul 2022

Relevant Coursework: Data Mining, Machine Learning, Operating Systems, High Performance Computing.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript, Go, Rust.

Frameworks: FastAPI, React, Node.js, Django, Flask, PyTorch, scikit-learn.

ML & Data: PyTorch, scikit-learn, pandas, NumPy, HuggingFace, spaCy, TensorFlow, Jupyter Notebooks.

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, ArgoCD, Terraform, Jenkins, CI/CD, Git.

Tools: Linux, Bash, SQL, Postman, JFrog, SonarQube, VS Code.

EXPERIENCE

Siemens Industry Software (Software Engineer Associate) - Pune, India Jul 2022 - Jul 2024

- Automated AWS infrastructure workflows using Python (Boto3), reducing manual provisioning effort by **30%** and replacing legacy Ruby pipelines.
- Built scalable Python-based automation pipelines handling multi-environment deployments, improving release consistency and reducing configuration errors by **~35%**.
- Developed reusable patch management frameworks, improving deployment efficiency by **40%** across production systems.
- Led Blue-Green deployment strategy using Ansible, reducing upgrade downtime by **50%** and enabling zero-risk rollbacks.
- Executed **44 production-grade upgrades in 4 months** with zero critical failures, debugging live systems and ensuring high system reliability under load.
- Mentored 5 junior engineers and created onboarding documentation, reducing ramp-up time by **~25%**.
- Increased code coverage by **200%** by introducing automated testing pipelines and enforcing quality gates via SonarQube in CI/CD workflows.

Siemens Industry Software (Software Engineer Intern) - Pune, India Mar 2022 - Jun 2022

- Automated AWS resource provisioning using **Terraform**, reducing deployment time by **30%**.
- Developed **Go + Terratest framework**, catching **95%** of infrastructure misconfigurations before production.
- Designed infrastructure validation pipelines ensuring near **100%** successful Terraform runs in CI/CD environments.
- Optimized environment setup workflows using **Ansible**, reducing setup time from **hours to minutes**.

Govt of Maharashtra, Water Resource Department (Software Developer Intern) - Pune, India Sep 2021 - Dec 2021

- Developed a full-stack inward/outward register system using **React** and **MySQL**.
- Digitized manual record workflows, improving operational efficiency by **40%**.
- Reduced document processing time from **days to hours** by designing structured database workflows and automated tracking systems.

PROJECTS

Spendora - LLM-Based Expense Intelligence System [HuggingFace, LangChain, Mistral, Gemma] Jun 2025

- Built an LLM-powered financial assistant using **LangChain** for natural language querying of expense data.
- Designed RAG-based architecture integrating structured financial datasets, improving response accuracy and reducing hallucinations in generated insights.
- Implemented conversational agents with memory and tool usage for contextual financial analysis.
- Enabled dynamic query handling over user transactions, improving insight generation speed and usability for non-technical users.

News Headline Classification (400K+ Dataset) [Python, PyTorch, spaCy] Mar 2025

- Built LSTM-based NLP model using **PyTorch** to classify news into 4 categories.
- Achieved **93.28% accuracy**, outperforming baseline ML models.
- Optimized preprocessing and training pipelines, reducing training time by **~25%** while maintaining model performance.
- Performed large-scale EDA and feature engineering on **400K+ records** to improve model generalization.

EXTRACURRICULAR ACTIVITIES

- Finalist at **RevolutionUC 2025**, Cincinnati's largest student-led hackathon, selected among 300 participants from 31 schools.
- Earned **SAFe® Practitioner 5.1 Certification** (Mar 2023), demonstrating proficiency in Agile frameworks.
